

# WE ARE HIRING

**Atlantic Engineering Services (AES)** is seeking a full-time Project Engineer to join our growing team in Jacksonville, FL. With additional offices along the East Coast, AES is an award-winning full service structural engineering firm with over 30 years of experience. Our exceptional team of professionals are passionate about serving our clients, providing engineering expertise to the architectural design and construction communities. Providing consulting services to a wide array of industries across the east coast, professionals at the firm craft structures in which people live, learn, play, heal, worship, and more. As a Project Engineer at AES, you will perform detailed phases of design engineering work for a variety of project sizes and complexities. You must be fully competent in all conventional aspects of design engineering and be capable of planning and conducting tasks requiring independent judgment in the evaluation, selection, and substantial adaptation and modification of standard design engineering techniques, procedures, and criteria.

## RESPONSIBILITIES

- Perform analysis and detailed design of structural steel, concrete and masonry structures for a wide variety of light/heavy industrial and private/commercial building type projects
- Prepare engineering calculations and engineering sketches and review drawings and BIM Models
- Provide detailed forensic engineering reports outlining cause and origin of damage to clients
- Manage multiple projects and assume responsibility for project execution within required timeframes
- Perform and Assist in QA/QC of final design packages prior to issuing for construction
- Communicate with staff and clients to provide time-lines and project updates on a consistent basis
- Providing both written and verbal reports to tight deadlines regarding multiple projects simultaneously
- Manage projects covering a variety of structure types and structural services

## QUALIFICATIONS

- Bachelor of Science in Civil Engineering
- P.E. licensed in the state of Florida is preferred
- 6+ years' experience in Structural engineering
- Project Management experience covering a variety of existing and/or new structures
- Design/analysis in environmental concrete structures and experience with ACI 350 a plus.
- Working knowledge of building codes and experience reviewing building plans and specifications

## BENEFITS

- Competitive compensation package that includes holiday and paid time off
- Employer assistance in purchasing company health and vision insurances
- Employer-paid long term disability insurance
- Employer-paid life insurance
- Voluntary Aflac dental and supplemental insurance policies
- Participation in self-directed 401K plan with matching

## PERKS

- Hands-on training and support
- Advancement opportunities
- Financial advisement services for investments and retirement options
- Company trips and events
- Community outreach opportunities
